

CloudWatch Alarm showing Treshold

SNS Action

The screenshot shows the 'Configure actions' step for the 'EC2 CPU Usage above Threshold' alarm. The left sidebar shows the steps: Step 1 - optional (Specify metric and conditions), Step 2 - optional (Configure actions), Step 3 - optional (Add alarm details), and Step 4 - optional (Preview and update). The main content area is titled 'Configure actions - optional' and contains a 'Notification' section. The 'Alarm state trigger' is set to 'In alarm'. The 'Send a notification to the following SNS topic' section shows a search for 'EC2-ASG-CPUUsage-Alarm'.

CloudWatch > Alarms > EC2 CPU Usage above Threshold > Edit alarm

Step 1 - optional
Specify metric and conditions

Step 2 - optional
Configure actions

Step 3 - optional
Add alarm details

Step 4 - optional
Preview and update

Configure actions - optional

Notification

Alarm state trigger

Define the alarm state that will trigger this action.

☒ In alarm
The metric or expression is outside of the defined threshold.

☐ OK
The metric or expression is within the defined threshold.

☐ Insufficient data
The alarm has just started or not enough data is available.

Remove

Send a notification to the following SNS topic

Define the SNS (Simple Notification Service) topic that will receive the notification.

☒ Select an existing SNS topic

☐ Create new topic

☐ Use topic ARN to notify other accounts

Send a notification to...

EC2-ASG-CPUUsage-Alarm

Only topics belonging to this account are listed here. All persons and applications subscribed to the selected topic will receive notifications.
