

Logs Insights Query Text

fields @timestamp, @message

| filter @message like /ERROR/

| stats count(*) as errorCount by bin(5m)

The screenshot shows the AWS CloudWatch Logs Insights console. The 'Query definition' section is active, displaying the query: `1 fields @timestamp, @message`, `2 | filter @message like /ERROR/`, and `3 | stats count(*) as errorCount by bin(5m)`. The 'Log group name' is set to `/aws/lambda/NotificationSender`. The 'Run query' button is highlighted in orange. Below the query, a status message indicates 'Completed. Query executed for 4 log groups.' The console also shows the 'Query generator', 'Fields', and 'Queries' tabs.

Results Screenshot

The screenshot shows the AWS CloudWatch Logs Insights console displaying the results of the query. The 'Logs (1)' tab is selected, showing a single record. The record is a bar chart with a blue bar at 23:05. The x-axis represents time from 22:40 to 23:35. The y-axis represents the error count, with a value of 1. The record details show the bin as `bin(5m)` and the error count as `errorCount`. The console also shows the 'Patterns (-)' and 'Visualization' tabs.

#	bin(5m)	errorCount
1	2026-06-28T23:00:00.000Z	1
