

The screenshot shows the AWS IAM console interface. At the top, there's a navigation bar with the AWS logo, a search bar, and a user profile dropdown for 'Victor E (929123273722)'. Below the navigation bar, the breadcrumb trail reads 'DynamoDB > Explore Items > OluPay-Merchant-Catalogue'. The main content area shows the 'OluPay-Merchant-Catalogue' role. A blue box highlights the role name, and a callout bubble points to it with the text 'New record created by Lambda'. The role's permissions are listed as 'AmazonDynamoDBReadOnlyAccess' and 'AmazonDynamoDBFullAccess'. The role is associated with the 'OluPay-Merchant-Catalogue' policy. At the bottom, there's a table of roles, with the 'OluPay-Merchant-Catalogue' role highlighted in blue.
